Randall Boyes

rdboyes | (613) 329 8730 | randy.boyes@gmail.com | rboyes | www.randy.pub | PhD

Epidemiologist and data scientist with 8+ years of experience leading quantitative research and analytics teams.

Professional Experience

Presage Group, Inc. — Burlington, ON
Director of Analytics (Remote) — 2021 - Present

- Served as technical lead from initial scope to client-facing reporting on over a dozen projects focused on the causes of human decision-making for clients in the aviation sector.
- Developed and supervised the development of internal tools for training and deployment of statistical models, automated reports and dashboards, and LLM-based web applications.
- Provided mentorship to junior staff and grew the team from one to five data scientists and analysts.
- Worked with the company's leadership team to develop and implement strategies for growth and expansion, including the developing new service offerings and pursuing new business opportunities.

Sunnybrook Health Sciences Centre — Toronto, ON
Data Scientist (Remote) — 2020 - 2021

- Worked with a team of physicians and analysts to develop and validate a prediction model for esophageal cancer outcomes using large health databases. This work was published in a medical journal.

UManitoba & Royal Canadian Dental Corps — Winnipeg, MB
Data Scientist (Remote) — 2018 - 2020

- Developed a prediction model for dental readiness in the Canadian Armed Forces. Results were published in military medicine and public health journals.

Queen's University — Kingston, ON
Adjunct Professor — 2015 - 2019

- Taught seven semesters of graduate-level statistics and quantitative analysis courses in the MPA and PMPA programs at the School of Policy Studies. The focus of these courses was on the application of statistical methods to real-world policy problems, since the students were current and future policy practitioners.

Education

Queen's University — Kingston, ON
Doctor of Philosophy: Public Health Sciences — 2016 - 2023

- Completed coursework in epidemiology, statistics, and research methods, with a focus on the application of statistical models to public health problems. Dissertation research focused on the development of prediction models for outdoor active play behaviour in children using data extracted from street-level images of their built environment along with other environmental and demographic data.

Queen's University — Kingston, ON
MSc Epidemiology & BScH Life Sciences — 2009 - 2015

Projects and Volunteer Activity

Open Source Software Development — Remote
Author or Maintainer — 2021 - Present

TidierPlots.jl: A 100% julia version of R's ggplot2	☆ 255	Firebase.jl: A julia client for Google's Firebase platform	☆ 29
Tidier.jl: Tidyverse-inspired data manipulation in julia	☆ 595	forester: Forest plots for visualizing meta-analysis in R	☆ 163

Wolfe Island Fire Department — Wolfe Island, ON
Volunteer Firefighter — 2024 - Present

Skills

Programming	R | Julia | Python | Stan (Bayesian Modelling) | SQL | Excel | Rust | C++ | Tensorflow
Reporting	Typst | LaTeX | Quarto | Next.js | Shiny | Firebase | Google Cloud | Docker | Nginx
Statistics	Causal Inference | Prediction Models | Randomized Trials | Graphical Models | Structure Learning
