Epidemiologist by training. Leading a team dedicated to modelling decision-making in high-risk scenarios at Presage.

Professional Experience

Presage Group, Inc. — Burlington, ON
Director of Analytics (Remote) — 2021 - Present

- As the technical leader of the company's data scientists and analysts, I am responsible for project scoping, analysis and research design, data management, production of reports, and client communication. I have led the completion of over a dozen projects focused on understanding human decision-making for clients in the aviation, air traffic control, and utilities sectors.
- I have personally developed and supervised the development of internal tools for training and deployment of statistical models and the creation of automated reports and dashboards.
- I provide mentorship to junior staff and have been responsible for hiring and onboarding new employees, starting from a team of one to a current team of five data scientists and analysts.
- I work with the company's leadership team to develop and implement strategies for growth and expansion, including the development of new service offerings and the pursuit of new business opportunities.

Sunnybrook Health Sciences Centre — Toronto, ON
Data Scientist (Remote) — 2020 - 2021

- I worked with a team of physicians and analysts to developed a prediction model for cancer outcomes using large health databases. This work resulted in two publications in medical journals.

UManitoba & Royal Canadian Dental Corps — Winnipeg, MB
Data Scientist (Remote) — 2018 - 2020

- I developed a prediction model for dental readiness in the Canadian Armed Forces. Results were published in military medicine and public health journals.

Queen's University — Kingston, ON
Adjunct Professor — 2015 - 2019

- I taught seven semesters of graduate-level statistics and quantitative analysis courses in the MPA and PMPA programs at the School of Policy Studies. I developed the curriculum for these courses and was responsible for all aspects of course delivery. The focus of these courses was on the application of statistical methods to real-world policy problems, since the students were primarily current and future policy practitioners.

Education

Queen's University — Kingston, ON
Doctor of Philosophy: Public Health Sciences — 2016 - 2023

- Completed coursework in epidemiology, statistics, and research methods, with a focus on the application of statistical models to public health problems. My dissertation research focused on the development of prediction models for outdoor active play behaviour in children.

Projects and Volunteer Activity

Open Source Software Development — Remote
Author or Primary Maintainer — 2021 - Present

- TidierPlots.jl: A 100% julia reimplementation of R's ggplot2
- Firebase.jl: A julia client for Google's Firebase platform
- Sentry.jl: A julia SDK for the sentry.io error monitoring service

Wolfe Island Fire Department — Wolfe Island, ON
Volunteer Firefighter — 2024 - Present
