 rdboyes |  (613) 329 8730 |  randy.boyes@gmail.com |  rboyes |  www.randy.pub |  PhD

Data science director and epidemiologist with 8+ years of experience leading quantitative research and analytics teams.

Professional Experience

**Presage Group, Inc.**
DIRECTOR OF ANALYTICS (REMOTE)

Burlington, ON
2021 - Present

- Served as technical lead from initial scope to client-facing reporting on over a dozen projects focused on the causes of human decision-making for clients in the aviation sector. Recent projects have resulted in reduction of staff turnover by 38%, reduction in procedural non-compliance by 60-80%, and an increase in staff satisfaction by 15%.
- Developed and supervised the development of internal tools for training and deployment of statistical models, automated reports and dashboards, and LLM-based web applications, reducing time-to-delivery per client engagement by 40%.
- Provided mentorship to junior staff and grew the team from one to five data scientists and analysts.
- Set AI policy and strategy for the company, including acceptable usage guidelines and overseeing integration of AI into analytics and research workflows.
- Worked with the company's leadership team to develop and implement strategies for growth and expansion, including developing new service offerings and pursuing new business verticals.

**Sunnybrook Health Sciences Centre**
DATA SCIENTIST (REMOTE)

Toronto, ON
2020 - 2021

- Developed and validated a prediction model for esophageal cancer outcomes using large health databases.

**Royal Canadian Dental Corps (with UManitoba)**
DATA SCIENTIST (REMOTE)

Winnipeg, MB
2018 - 2020

- Developed a prediction model for medical readiness in the Canadian Armed Forces.

**Queen's University**
ADJUNCT PROFESSOR

Kingston, ON
2015 - 2019

- Taught seven semesters of graduate-level statistics for students in the MPA and PMPA programs.

Education

**Queen's University**
DOCTOR OF PHILOSOPHY: PUBLIC HEALTH SCIENCES

Kingston, ON
2016 - 2023

- Completed coursework in epidemiology, statistics, causal inference, and experimental design. Developed models for outdoor active play in children using data from street-level images of their built environment.

**Queen's University**
MSc EPIDEMIOLOGY & BSch LIFE SCIENCES

Kingston, ON
2009 - 2015

Projects and Volunteer Activity

Open Source Software Development
